ENHANCING YOUR NATURAL BEAUTY

## ISQE (INJECTABLE SKIN QUALITY ENHANCEMENT)

IT IS A HYALURONIC ACID TREATMENT PROCEDURE THAT HYDRATES THE SKIN AND IMPROVES THE QUALITY AND TEXTURE OF THE SKIN.

THE PROCEDURE IS DONE ONCE EVERY 6-9 MONTHS. WHEN A PATIENT DOES THIS TREATMENT REGULARLY EVERY 6 MONTHS IT LEAVES AN ACCRUAL OF 10% HYALURONIC ACID IN YOUR SKIN AS IT STIMULATES NEW COLLAGEN PRODUCTIONS.

YOU CAN START WITH THIS PROCEDURE AS EARLY AS THE AGE OF 20.

### HOW DOES IT WORK?

A PATIENT NEEDS TO BOOK A CONSULTATION WITH DR IZOLDA HEYDENRYCH OR DR MINKE KOEGELENBERG. ONLY ONCE IT HAS BEEN DETERMINED THAT YOU ARE A CANDIDATE FOR THIS PROCEDURE A DATE WILL BE SCHEDULE FOR THE ISQE TREATMENT.

### ARE THERE ANY PREPARATIONS?

YES, IT IS IMPORTANT THAT A DIETARY LIST IS STRICTLY FOLLOWED AS WELL AS SPECIFIC REQUIREMENTS PERTAINING TO YOUR DAILY ROUTINE WHICH WILL BE DISCUSSED DURING THE CONSULTATION.

### WHAT CAN BE EXPECTED DURING THIS PROCEDURE?

ON THE DAY WE WILL BE APPLYING A LOCAL ANAESTHETIC TO YOUR SKIN. THERE WILL BE A WAITING PERIOD OF APPROXIMATELY AN HOUR. THE PROCEDURE OF ADMINISTERING THE HYALURONIC ACID WILL THEN START.
